

Fluoroscopy

Barium Exam- Product Ingredient Protocol

Purpose: To prevent adverse or allergic reaction from any of the barium exam products.

Action: Before every barium exam; ask your patient if they have any known allergies or sensitivities to any foods or food products.

If YES: Inform the patient of the Inactive Ingredients that are in each type of barium exam product that you plan to use. If the patient is allergic to any of these ingredients, the exam should not be performed and their referring Dr. should be notified.

If NO: Proceed with the exam.

Location of Ingredients: Portal page, Operations, Fluoro Icon, Protocol-Adult or Pediatric-
Barium Product Inserts

*Ask the on-site radiologist if needing assistance.

*Print and have product inserts easily available to review with your patient.
