Overview

- Evaluate and treat a varicocele
- The use of fluoroscopic systems for interventional purposes is restricted to radiologists and individuals to whom a physician has delegated authority pursuant to the Occupations Code, Chapter 601, and the applicable rules of the Texas Medical Board.

Indications

- Varicocele

Examination Time

- 1 hour and 45 minutes

Patient Preparation

- Labs completed within one month of procedure
- Nothing to eat or drink 4 hours before procedure
- Stop blood thinners 5 days before procedure
- Obtain informed consent
- Question for allergies

Equipment

- Siemens C-arm
- Sterile pack
- Omnipaque 300
• Various size embolization coils
• Various catheters and wires
• Power injector

Patient Position & Imaging Field

• Supine

Acquisition Protocol - Routine Study

• Radiologist performs fluoroscopy and acquires images

Data Processing

• Technologist will send images taken to PACS (Picture Archiving and Communication System).

• Technologist will enter Dose Area Product in the appropriate field of RIS (Radiology Information System).

• Technologist will enter Fluoro Time and SEE (Skin Entrance Exposure) into the technologist notes field of the RIS.

Radiation Exposure levels

• Recommended operator guidance reference level for this fluoroscopically-guided interventional procedure is 90 minutes beam-on time. Threshold reference level is a SEE of 5 Gy (Gray).

• Radiation Exposure levels are monitored through the Austin Radiological Association’s monthly technologist QA process.

• If the reference level is exceeded, further analysis will be performed by the Protocol Committee and appropriate action taken to include possible patient follow-up.

Protocol Review

• Not to exceed 14 months.
