

**This is NOT an interpretation of the examination.
See patient dictated report for radiologist findings & impression.**

BIOPHYSICAL PROFILE ULTRASOUND

Patient Name: _____
 ACC#: _____
 MRN#: _____
 DOB: _____

Ref Physician: _____
 Date: _____
 Site: _____
 Tech/ext: _____

Variable	Score 2	Score 0
Fetal posture and tone (FT)	1 episode of active extension with return to flexion of fetal limb(s) or trunk; opening and closing of hand considered normal tone	Slow extension with return to partial flexion, movement of limb in full extension, or absent fetal movement
Fetal movement (FM)	3 discrete body/limb movements in 30 minutes or less (episodes of active continuous movement considered as single movement)	Less than 3 episodes of body/limb movements in full 30 minutes
Fetal breathing movements (FBM)	1 episode of >30 seconds of FBM in 30 minutes or less	Absent or no episode of > 30 seconds in full 30 minutes
Amniotic fluid index (AFI); sum of four quadrants	AFI > 5.0cm	AFI ≤ 5.0cm

Biophysical profile is based on an 8 point scale. If the score is reduced by 2 points or more (a score of 6 or less out of a possible 8) a radiologist's consultation is required.

Tone _____ Movement _____
 Breathing _____ Fluid _____
 Total _____

Tech Comments: _____
